MONTHLY BRIEF · Vol.20

Where Are People Moving?

All summer demand converges on NE-Asia short-haul.

JP
→ Korea·Taiwan·China·Thailand

Bookings +70%

KR
→ China·Taiwan·Japan

Korea–China +70 flights

VN
→ India·Russia·Europe

10.6M in 5 months

SEA
→ India 32M boom

Bangkok·Bali

Integrated NE-Asia · SE-Asia inbound / outbound brief · as of mid-June · 2026.06.15

INDEX · CONTENTS

OVERVIEW

One Map, Four Markets

Reading summer 2026 (Jun–Aug) through source → destination mapping

BIG PICTURE

All short-haul demand converges on NE Asia

Weak-yen 'last chance' + Korea–China route easing + India boom — three currents at once

+70%	+70 flights	32M	3x
KR→JP summer bookings	**Korea–China added flights**	**India outbound**	**Japan departure tax (7/1)**
Weak-yen 'last chance'	+56 passenger flights alongside	Disperses across SEA	June is the buying golden window

Key Perspective

This summer, demand follows 'people's movement,' not 'destinations' — short-haul source markets lead the recovery.

Weak-yen urgency, Korea–China route easing and India's boom all grow short-haul demand, and Vietnam absorbs that flow as a stable medium-haul market.

Short-haul advantage · **Long-haul** contraction · **Source diversification** = core summer structure

Source: Maeil Business · JNTO · VNAT · TAT · MOLIT summer schedule (2026.06)

UPDATE

Ceasefire is positive — but the impact lags

US–Iran ceasefire underway + Hormuz reopening hopes → oil & surcharges start falling, but physical recovery takes weeks–months

$87	−18%	15%	4M–12M
Brent crude (6/13)	**June int'l fuel surcharge**	**Hormuz traffic**	**Supply normalization period**
−30% vs the $126 peak	first cut (KR basis)	vs pre-war (recovery delayed)	IATA: 9/11 ~4 months / '08 ~10–12 months

What changed

- Oil: May peak $126 → June $87, 8-week low
- Airline stocks & jet-fuel supply outlook improve (Delta +12%)
- Fuel surcharge: first cut begins in June
- Vietnam: jet-fuel crunch → shifting to easing

What to watch (the lag)

- Iran uncommitted + Hormuz traffic at ~15%
- Surcharges apply at 'ticketing' → existing tickets unchanged
- Physical recovery: weeks–months for refining & mine-clearing
- Felt in earnest in July peak (June is transitional)

Implication The lag between headlines and impact = **a window for partners who move first**. The 'June golden window' logic only gets stronger.

JP

To Japan — Korea, Taiwan, China & Thailand head there at once

Bookings +70% · Fukuoka #1 in search · Jeju Air 36 flights/wk to Fukuoka (Aug) · regional cities surge

Source markets → JP

KR **Korea (top source, +70% surge)**
1.176M (+21.6%) · #1 in search: Fukuoka 13.8%

TW **Taiwan (6.7M/yr, Japan #1 destination)**
JP tickets +64% · Tokyo #1·Osaka #3 · Q1 bookings +30%

CN **China (outbound fully recovered to 101M)**
Korea–China +70 flights → China–Japan easing expected · digital natives

TH **Thailand (+105% surge) · SG regional-city campaign**
Tied to JNTO 'Go Japan Lah!'

Market Insight — Japan Trends

Fukuoka is #1 in Korean search

Jeju Air +36 flights/wk (Aug) · seen as 'cheaper than Jeju'

Osaka long-stay +272%

Long-stay, TW and CN demand all expanding

Demand disperses to regional cities

Niigata·Miyazaki·Okinawa·Matsuyama·Sendai rising

Weak-yen 'last chance' mindset

Short-haul demand concentrates before the 3x departure-tax hike (7/1)

Source: Maeil Business · JNTO · AeroRoutes · MOLIT summer schedule (2026.06)

KR

Korea — coming in, and going out

Korea–China +70 flights · long-stay +272% · 56% domestic interest · 30M outbound era

Inbound → KR (who comes to Korea)

CN **China (top source + Korea–China +70 flights)**
101M recovered · Shanghai 900K visits · Jul–Aug summer break
→ family/student inbound expected to surge

TW **Taiwan (KR tickets +104%, Seoul reaches #2)**
Seoul overtakes Osaka to #2 · Busan enters #6
→ K-pop + medical tourism + value drivers

JP **Japan (Golden Week: Seoul #1, +41%)**
Golden Week top 5: Seoul·Bangkok·Taipei·Hong Kong·Bali
→ Seoul→Daegu→regional dispersion begins

Outbound → where Koreans go

Destination flows (Jun–Aug)

JP Japan — Fukuoka #1 in search, bookings +70%
CN China — visa-free extended, Shanghai/Yantai emerging
VN Vietnam — Phu Quoc +53%, Korean summer resort demand
🏠 Domestic — interest +56% (Jeju/Gangneung/Busan/Yeosu)
→ FX 1,560 → NE Asia (JP/CN) preferred over SE Asia

Implications for Vietnam

- 30M Korean outbound era — VN is a +53% growth destination
- Long-stay +272% — long-stay demand shifts to resorts
- Short-haul recovery — VN benefits steadily as medium-haul

VN

To Vietnam — India, Russia and Europe pour in

10.6M in 5 months · Long Thanh airport opens June · health declaration mandatory 7/1 · Phu Quoc searches +53%

Source markets → VN

IN **India (32M outbound · VN +71%)**
Air India long-haul -30% → accelerating short-haul (SEA) focus

RU **Russia (more direct flights, sharp rebound)**
Beach-resort demand centered on Nha Trang·Da Nang·Phu Quoc

KR **Korea (Phu Quoc +53%, 4+ night stays +20%)**
Sun Group SITF Phu Quoc deal (KR marketing)

EU **Europe (charters + Prague direct in Oct) · CN core source**
Secure inventory centered on charter blocks

Demand & Supply Environment

Demand signals (inbound)

- Russia direct rebound + India +71% + Europe charters inflow
  → resort demand centered on Da Nang·Nha Trang·Phu Quoc
- Phu Quoc +53% — core Korean summer resort destination
  → 4+ night stays +20% trend

Supply environment

- Vietnam Airlines summer 5.5M domestic seats promo (regional boost)
- Long Thanh opens June → southern capacity expands

⚠ Operational note (7/1)

- Mandatory health declaration — covers entry, exit & transit
  → prepare guest notices in advance (D-16)

SEA & VN

SEA — New Supply, Bali visa-free, India Boom

TH 14.03M in 5 months · 68 new Bangkok hotels · Bali visa-free under review · India surging across SEA

Market environment by country

TH Thailand

14.03M (5 months) · 68 new Bangkok hotels open

Rainy season (Jun–Oct) · TAT wellness 'Healing is the new luxury' · 1M VN target

ID Indonesia

4.68M (4 months) · Bali visa-free resumption under review + earlier peak season

India #2 (570K) · Australia spend↑ stay↑ · weak rupiah = tourist burden ↑

MY Malaysia

17.5M (5 months) · SQ MoU · $2.7B airport investment · VM2026

SEA volume market — expanding infrastructure investment

IN India (source)

32M outbound — booming across all of SEA

TH 2.5M · VN +71% · ID 570K · accelerating short-haul focus

Vietnam view — the SEA competitive landscape

India = a tailwind across SEA

32M outbound flows into TH·VN·ID at once (VN +71%)

Thailand new-supply expansion

68 new Bangkok hotels — intensifying SEA room competition

Bali visa-free variable

If resumed, absorbs India·Australia demand — could compete with VN

Vietnam's position

Medium-haul, stable source diversification — a distinct edge in SEA

Source: TAT · Indonesia Ministry of Tourism · Tourism Malaysia · Air India (2026.06)

PROPOSAL

Set Conditions Now, and claim the peak season early

The point isn't to cut price in peak season — it's to lock in demand 'first' with conditional promotions

Tier 1 Volume-guarantee type

Lock in confirmed demand early

- OMH commits to rooms in advance
- → removes peak-season vacancy risk
- → stable operations via confirmed revenue
- *Da Nang·Phu Quoc·Nha Trang — fits strong-demand cities*

Tier 2 Long-stay·advance type

Prioritize high-value, long-stay guests

- 4+ night long-stay / early-booking condition
- → defend rate with longer LOS
- → secure early cash flow
- *Fits Phu Quoc·Nha Trang resorts*

Tier 3 Open-date utilization type

Expose only your open dates

- Last-minute / off-peak dates only
- → fill only empty rooms
- → peak-season ADR stays protected
- *Fits rainy-season·off-peak dates*

Why This is Good for Hotels

"Without cutting your peak-season ADR, OMH fills your off-peak and open dates through its Korean channel — so you secure peak demand ahead of competing hotels."

How it works: applied as a B2B private rate → no impact on OTA rack rate or ADR · time-limited · auto-reverts at expiry

CLOSING · Summer 2026 Market Summary

All short-haul demand converges on NE & SE Asia

1	**Short-haul recovery = window of opportunity**	Weak-yen urgency, Korea–China route easing and India's boom all grow short-haul demand at once.
2	**Strong demand signals for Vietnam**	Phu Quoc +53%, Russia direct rebound, India +71%, Europe charters — multi-source inflow at once.
3	**Ceasefire·oil = airfares trending down**	Fuel surcharges saw their first cut in June — easing the cost of short-haul travel.
4	**June–summer is the key season**	Japan's 3x departure tax & VN health declaration start 7/1 — summer peak demand kicks in.
