## Impact of U.S.-Iran Conflict on Asia Tourism

**Flight Disruptions:** Over 11,000 flights canceled/delayed in the Middle East as of March 3; 1M+ passengers affected. (Ref. Cirium)

**Infrastructure Damage:** Closure of Dubai and Hamad International Airports; missile strike reported near Fairmont The Palm, Dubai.

**Logistics Crisis:** Near-total suspension of transit through the Strait of Hormuz (channels ~20% of global oil consumption).

**Energy Costs:** Brent crude surged to \$79/barrel; JP Morgan forecasts \$100+ if the conflict persists.

| Country                                                                             | Key Impacts                                                                                                                                   | Risk Factors                                                                                         | Opportunities                                                                                                  |
|-------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------|
|    | Dubai flights diverted and total cancellation of Middle East travel packages.<br>Projected GDP decline of 0.3–0.8%p due to rising oil prices. | Decrease in long-haul travelers from Europe.<br>Surge in KRW/USD exchange rate and hike in airfares. | Influx of Chinese tourists driven by China-Japan tensions.<br>Resilient inbound demand sustained by K-Culture. |
|    | AL stock -6.4%; Middle East flights canceled<br>MOFA issued emergency travel alerts                                                           | Middle East route disruptions to Europe/Africa.<br>High oil prices and declining Chinese arrivals.   | Rise in defense-related stocks.<br>Ability to absorb demand as an alternative Asian destination.               |
|   | Risk of halted Iranian oil imports (high dependency)<br>Airline stocks and Hang Seng Index (-2.1%) plummeted                                  | High vulnerability to oil price spikes.<br>Weakened outbound travel demand.                          | Strategic oil reserves secured for 4–5 months.<br>Potential to substitute with Russian oil imports.            |
|  | 30–80% drop in Middle East arrivals.<br>Phuket, Bangkok, and medical tourism hit hard.                                                        | Excessive reliance on Middle Eastern carriers.<br>High fuel costs; projected 0.5–0.8% GDP decline.   | Launch of crisis-response promotion campaigns.<br>Expected demand as a "temporary safe haven"                  |
|  | Diversified markets cushioned the impact.<br>21.4% Jan arrival growth maintained.                                                             | Potential drop in European long-haul travelers if prolonged.                                         | Gains from being an alternative travel destination.<br>Strong transit hubs via Istanbul and Singapore.         |
